## Drive Electric NSW EV Fast Charging Grants

### Welcome to Round 2 of the Fast Charging Grants

#### **Privacy, confidentiality and useful information about the drive electric NSW fast charging grants**

**Background information:** The NSW Government is leading the way in the race towards net zero emissions. The [Net Zero Plan Stage 1: 2020-2030](#) sets out the state's ambitious plan to protect our future. The shift to electric vehicles (EV) will play an important part in reducing emissions.

Through [The NSW Electric Vehicle Strategy](#) the State Government is looking to accelerate the fleet of the future with the aim to increase EV sales to 52% of all new car sales by 2030-31.

Action 2 under the strategy is building a world-class EV charging network across NSW, with a \$149 million investment to develop a fast charging infrastructure across the state.

This investment will build on existing public EV charging across the state over the next 4 years to support and encourage growth of the EV market by:

- overcoming range anxiety through the development of a broad, visible and accessible fast charging network across NSW
- ensuring connectivity between metropolitan and regional areas
- future-proofing the EV charging network past 2030
- co-funding private industry to build, own and operate the charging stations
- maximising grid support and reducing emissions.

The Drive electric NSW EV fast charging grants will support charge point operators (CPOs) to construct EV fast charging stations within optimal zones as identified on the [NSW EV fast charging master plan interactive map](#).

**Drive electric NSW fast charging grants:** Grant funding will be offered through a competitive single stage application process. The Office of Energy and Climate Change (the Department) will assess eligibility and basic site details. If applicants meet the eligibility criteria, their application will be assessed against the merit criteria as listed in the guidelines.

Co-funding can also include renewable energy generation and battery storage for EV charging stations.

Funding will be prioritised for projects that can demonstrate both value for money and merit, including building regional charging stations, innovation in station design and diversity of locations proposed.

#### **Key changes from round one**

Please note these key changes from round one that will affect your application in round two.

- There is now a single stage application and assessment process, as opposed to two stages.
- There are no longer Blue and Green zones. All remaining zones in the guidelines are eligible for co-funding.
- An additional 25 zones have been added to the priority zones, resulting in a total of 275 optimal zones that qualify for funding. 73 of these zones were funded in round one.

# Drive electric NSW fast charging Round 2 Application Form Preview

- There are two funding streams: Standard Stream and Fast-Track Stream.
- Applicants must fund a minimum of 50% of standard stream sites and their maximum bid may be no more than \$490,000 on average.
- Applicants must fund a minimum of 30% of fast track stream sites and their maximum bid may be no more than \$900,000 on average.
- Bids will be assessed in two parts; Standard Stream sites and Fast Track sites. The same merit criterion apply to both streams and only the most meritorious site/s will be awarded co-funding in any zone.
- The maximum co-funding bid size is now capped at \$30 million per applicant.
- Round Two will co-fund up to \$80 million in eligible EV charging projects.
- The NSW Government will provide a set contribution to applicants per site for the installation of way-finding signage on major roads and highways (where required).
- Applicants that apply for co-funding and pass the eligibility stage will be provided the opportunity to briefly present their application to the assessment panel.
- Applicants may choose which plugs to install per site, as long as it is one of the types listed in the FCAI standard. Please note, justification is required if only choosing one type, and the assessment panel will see sites that include a diversity of plug types as more meritorious.

## Useful information to support your application:

- **Essential reading:** Before completing this application, please read the [Drive electric NSW EV fast charging grant guidelines](#).
- **Program FAQs:** [EV fast charging grants FAQs](#)

**Supporting files for your application:** Files can only be uploaded one at a time so you need to allow enough time for each file to upload before trying to attach another file. Files can be up to 25MB each, however, we recommend trying to keep files to a maximum of 5MB – the larger the file, the longer the upload time.

**How to gain access to the list of potential EV charging sites in NSW:** Potential sites across NSW have registered expressions of interest (EOI) to host EV fast charging. You may wish to contact one or more of these sites to consider developing EV fast charging on the location.

It is not compulsory to use these sites if you have a alternate site you wish to nominate.

For access to the current list please send an email to [electric.vehicles@environment.nsw.gov.au](mailto:electric.vehicles@environment.nsw.gov.au) using the subject line **“Request for EV site host list”**. You will be asked to agree to a confidentiality and disclosure statement, and then a link will be provided.

**Please note:** All cost fields in this form are mandatory. If you have no cost to assign against a particular field, please enter "0" in this field, otherwise the form will not allow you to complete.

For any other questions or queries please contact us at [electric.vehicles@environment.nsw.gov.au](mailto:electric.vehicles@environment.nsw.gov.au).

**Privacy statement:** This privacy statement sets out the NSW Government's practices relating to the privacy of your personal information. The department's privacy practices are regulated by the [Privacy and Personal Information Protection Act 1988 \(NSW\)](#) (PIIP Act) and the department's [Privacy management plan](#).

When you complete your Drive electric NSW EV fast charging application form you will be asked to provide information to the department. The information provided relates to you personally and includes any information or opinion made about you. Personal information

# Drive electric NSW fast charging Round 2 Application Form Preview

includes your name, address, phone number, email address or any information from which your identity can be reasonably ascertained.

The department will only collect your personal information for the purpose of administering the Drive electric NSW EV fast charging grants . Further information about the program is in the [Drive electric NSW EV fast charging grant guidelines](#).

The department may only use your personal information in a way which is consistent with this purpose, which could include contacting you in relation to your application or project.

We will hold information you have provided for a period that is appropriate for the purpose for which it was provided. Your information will be archived and disposed of in accordance with the department's policies, legislative requirements and guidelines based on the [NSW State Records Act 1998](#).

We will not disclose your personal details for any other purpose unless the disclosure is authorised by the PPIP Act and Regulations. Your consent to disclose information for particular purposes may be sought by us or given by yourself for a specific purpose. If appropriate consent is not provided, we may not be able to provide certain products and services to you or your agents.

Under the PPIP Act you have the right to access your personal information held by the department without excessive delay or expense. You also have the right to have your personal information corrected in certain circumstances (e.g. if it is incorrect). For more information about the department's privacy, visit .

Should you wish to access or correct your personal information contact the department's designated privacy team:

Information Access & Privacy Unit

4 Parramatta Square, Locked Bag 5022, Parramatta NSW 2124

Phone: 02 9860 1440

Email: [privacy@dpie.nsw.gov.au](mailto:privacy@dpie.nsw.gov.au)

**Confidentiality and disclosure information** Any information provided by you that is clearly identified as commercial in confidence will be treated and disclosed by the department in accordance with section 7.7 of the guidelines.

**Limitations:** The department and its employees, agents and officers (department representatives) do not give any representation, warranty or guarantee, whether express or implied, in relation to the information contained in this application or the guidelines. This include their completeness, accuracy, currency or reliability or the process by which they were prepared.

None of the department representatives give opinions regarding, legal, accounting, regulatory, taxation or any other matters. Without limiting the foregoing, nothing in the guidelines is or should be regarded as advice in relation to those matters. Nothing contained in the guidelines or application form may be relied upon as a promise, guarantee, representation or warranty.

## Contacts

\* indicates a required field

# Drive electric NSW fast charging Round 2 Application Form Preview

## Lead applicant details

### Lead applicant name \*

Organisation Name

### As the lead applicant organisation, provide your ABN \*

The ABN provided will be used to look up the following information. Click Lookup above to check that you have entered the ABN correctly.

Information from the Australian Business Register	
ABN	
Entity name	
ABN status	
Entity type	
Goods & Services Tax (GST)	
DGR Endorsed	
ATO Charity Type	<a href="#">More information</a>
ACNC Registration	
Tax Concessions	
Main business location	

Must be an ABN.

To be eligible, lead applicants must provide the ABN of their organisation

### If you trade under another name using the above ABN provide that trading name.

### Provide the registered address of the business. \*

Address

  

**If your postal address is different (e.g. a PO Box) please provide the postal address. If your registered business address is the same as your postal address, then tick the 'Same as above' \***

Address

  

### Applicant's business website address

Must be a URL.

# Drive electric NSW fast charging Round 2 Application Form Preview

## Primary Contact

This person will be contacted on all matters relating to this application. Note that an authorised person from your organisation will need to have their details added at the end of this form.

### Primary contact name \*

Title	First Name	Last Name
<input type="text"/>	<input type="text"/>	<input type="text"/>

### Primary contact position title \*

The title held in the business e.g. Director, Owner, CEO, General Manager, etc.

### Primary contact postal address \*

Address

  

Provide the postal address of the authorised person. If it is the same as the business postal address, then tick the 'Same as business postal address' box.

### Primary contact phone number \*

Must be an Australian phone number.

### Primary contact email \*

Must be an email address.

### Primary contact mobile phone number \*

Must be an Australian phone number.

### Do you have project partners? \*

- Yes  
 No

## Project partner details

Applicants may apply for funding as part of a consortium or collaborative project. A collaborative project is undertaken by a lead applicant and one or more project partners where the benefits of the project (financial and otherwise) are shared amongst the collaborative parties. All project partner organisations must be listed. Only the lead applicant will enter into the funding agreement with the Office.

Please use add more or + to add additional project partners as required (max of 10 project partners permitted).

# Drive electric NSW fast charging Round 2 Application Form Preview

## Provide the ABN of this project partner \*

The ABN provided will be used to look up the following information. Click Lookup above to check that you have entered the ABN correctly.

Information from the Australian Business Register	
ABN	
Entity name	
ABN status	
Entity type	
Goods & Services Tax (GST)	
DGR Endorsed	
ATO Charity Type	<a href="#">More information</a>
ACNC Registration	
Tax Concessions	
Main business location	

To be eligible, all project partner organisations must provide their ABN

## If you trade under another name using the above ABN provide that trading name.

## Attach a letter verifying the role of the project partner, including any funding contributions. \*

Attach a file:

A minimum of 1 file must be attached.  
Maximum file size 25MB

## Eligibility

\* indicates a required field

### Funding stream selection

#### Are your proposed site(s) in standard, or fast track priority zones? Is this site in a standard or fast-track priority zone? \*

- Standard
- Fast track
- Not in a priority zone

The Electric Vehicle Fast Charging Master Plan (the Master Plan) identifies standard and fast-track priority zones that are ideal for charging stations across NSW. For round two, there are different settings for allocation of grants funding for stations located in fast-track zones and standard zones. Please refer to the guidelines for details.

## Welcome

# Drive electric NSW fast charging Round 2 Application Form Preview

Welcome. The following eligibility questions will help you determine whether you are eligible to apply for the Drive Electric NSW EV fast charging grants.

## Entity type

**Are you: \***

- an entity incorporated under the Corporations Act 2001(Cth)
- a state-owned corporation or subsidiary of an Australian state or territory owned corporation; or
- a local government or council in NSW
- none of the above

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

## Strategy and accountant declaration

**Can you provide a funding strategy and an accountant declaration? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

## Knowledge sharing

**Do you agree to participate in knowledge sharing activities related to the project? \***

- Yes
- No

Please refer to the Knowledge Sharing Principles within the funding guidelines, and the funding deed template when published on our website.

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

## New EV fast charging stations

**Does your project construct new fast and/or ultra-fast charging stations? \***

- Yes
- No

# Drive electric NSW fast charging Round 2 Application Form Preview

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

## Meets minimum requirements in standard zones

Does your project meet the following minimum requirements for each station **located in standard zones** included in the bid:

**Does your project meets the following minimum requirements at each of the sites included in the bid: \***

- A minimum of two chargers to service a minimum of four bays concurrently (i.e. four charging plugs)
- A minimum of two charging bays rated at a minimum of 175kW per bay (+/- 20%)
- A minimum of two charging bays rated at a minimum of 350kW per bay (+/-15%)
- Includes redundancy in the system (e.g an additional 22kW AC plug)

If your project does not meet these minimum requirements you will be ineligible to apply for this grant. Please refer to the guidelines for further information. All options must be selected in order to be eligible to apply for this grant

## A connection of 500kVA at each station in standard zones

**Are you able to provide a minimum of a 500kVA connection at each of the station in standard zones in your bid? \***

- Yes
- No

Please note that the intent here is that 500kVA is available for chargers at the site

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the funding guidelines for further information.

## Meets minimum requirements in fast track zones

**Does your project meet the following minimum requirements for each station located in fast-track zones included in the bid: \***

- A minimum of four chargers to service a minimum of eight bays concurrently (i.e. eight charging plugs)
- A minimum of six charging bays rated at a minimum of 175kW per bay (+/- 20%)
- A minimum of two charging bays rated at a minimum of 350kW per bay (+/-15%)

At least 3 choices must be selected.

If your project does not meet these minimum requirements you will be ineligible to apply for this grant. Please refer to the guidelines for further information. All options must be selected in order to be eligible to apply for this grant

## A connection of 750kVA at each station in fast track zones

# Drive electric NSW fast charging Round 2 Application

## Form Preview

**Are you able to provide a minimum of a 750 kVA connection at each of the sites in fast-track zones in your bid? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the funding guidelines for further information.

### Plug types

Plug types installed must follow International Electrotechnical Commission (IEC) standards and as published by the Federal Chamber of Automotive Industries (FCAI).

**Do your fast charging stations utilise plug types which comply with International Electrotechnical Commission (IEC) technical statements and / or codes of practice? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

### Location within a priority zone

**Are your project fast charging sites either: \***

- Located within a priority standard or fast-track zone identified in the NSW Fast Charging Master Plan
- Located outside a priority zone but you can provide rationale for the site selected

At least 1 choice must be selected.

You can select more than 1 response for this question. If you have selected "location outside a priority zone" as an option, you will be asked for additional information on page 5 of this application about why you have selected that location.

### Renewable energy

Renewable energy sources must be either on-site renewable energy generators, off-site renewable energy generators, large-scale generation certificates (LGCs), or a combination of sources

**Do all stations source renewable energy to cover their electricity usage? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

# Drive electric NSW fast charging Round 2 Application

## Form Preview

### Public access

**I confirm that no sites included in this bid will restrict public access to EV fast charging by providing priority, reserved or exclusive access. \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

### Lane markings standard zones

**Do all of your EV fast charging sites located in standard zones have a minimum of 4 designated car parks for 4 BEVs with lane markings? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

### Lane markings fast track zones

**Do all of your EV fast charging sites located in fast-track zones have a minimum of 8 designated car parks for 8 BEVs with lane markings?**

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

### Installation and commission standard zones

**Can you install and commission all EV fast charging stations located in standard zones within 2 years of executing the funding deed with the NSW Government? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

### Installation and commission fast track zones

# Drive electric NSW fast charging Round 2 Application

## Form Preview

**Can you install and commission all EV fast charging stations located in fast-track zones within 18 months of executing the funding deed with the NSW Government? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

### Payment options

Payment options must not be restricted by any form of business-related prioritisation, such as memberships, subscriptions or smart phone applications.

**Do your project(s) EV fast charging stations include commonly accepted payment options that can be reasonably expected by EV drivers, such as EFTPOS or using a bank card? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

### Disability access

**Can your project demonstrate that charging bays will be available for use by people with a disability, to give equitable access for charging? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

### EV charging bays marked and easy to find

**Do all of your project(s) EV fast charging sites have charging bays that will be clearly marked and easy to find? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

### Minimum hours of availability

# Drive electric NSW fast charging Round 2 Application Form Preview

**Can your project demonstrate that charging stations can be accessed daily with minimum hours of availability from 6:00 am - 9:00 pm? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

## Fees from co-located businesses

**Can your project demonstrate that other fees from co-located businesses will NOT be asked of drivers to access a fast charging location, such as a shopping centre carpark fee? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

## Online availability status platform

**Does your project have an online platform that will enable the EV charging stations charging bays to publicly show their availability status? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

## Data accessible by The Department (OECC)

**Does your project allow for live charging station data to be accessed and used by the department, as per the terms in the funding agreement? \***

- Yes
- No

You have chosen a response which means you are ineligible to apply for this grant. Please refer to the guidelines for further information.

## Corporate governance

\* indicates a required field

# Drive electric NSW fast charging Round 2 Application Form Preview

**Please provide a current (historical) company extract from the Australian Securities & Investments Commission (ASIC) of the lead applicant organisation. \***

Attach a file:

A minimum of 1 file must be attached.  
Maximum file size 25MB

**Has the applicant or any of its senior office bearers (directors, shareholders, executive directors, project managers) been involved with a business failure (liquidation, voluntary administration or receivership)? \***

- Yes
- No

**Please provide more information relating to involvement with a business failure (liquidation, voluntary administration or receivership). \***

Word count:  
Must be no more than 250 words.

**Has the applicant or any of its senior office bearers been declared bankrupt? \***

- Yes
- No

**Please provide more information relating to declared bankruptcy \***

Word count:  
Must be no more than 250 words.

**Has the applicant or any of its senior office bearers been the subject of a legal investigation for a criminal offence? \***

- Yes
- No

**Please provide more information relating to criminal offence \***

Word count:  
Must be no more than 250 words.

# Drive electric NSW fast charging Round 2 Application Form Preview

**Has any previous government grant or contract with the applicant been repaid or terminated for any reason? \***

- Yes
- No

**Please provide more information on previous government grant or contract that was repaid or terminated \***

Word count:

Must be no more than 250 words.

**Has there been any past, current, pending or finalised litigation against the applicant or any of its senior office bearers during the last three years? \***

- Yes
- No

**Please provide more information relating to any litigation during the last three years \***

Word count:

Must be no more than 250 words.

## Project site details

\* indicates a required field

**Project title \***

Must be no more than 20 words.

Please provide a project title for your bid.

**Project description \***

Word count:

Must be no more than 600 words.

Please provide a description of your bid, where you will build and how this adds to the charging network in NSW.

**How many standard sites are including in your bid? \***

# Drive electric NSW fast charging Round 2 Application Form Preview

Must be a number.

## How many fast track sites are included in your bid? \*

Must be a number.

These are the total number of sites calculated across any fast track or standard priority zones indicated

## How many project sites are included in your bid?

This number/amount is calculated.

## Minimum charging station requirements within a single bid

There is no maximum for the number of regional charging stations that can be included within a bid (up to the funding cap), as long as metropolitan minimums are achieved. Metropolitan charging stations outside Greater Sydney include the Central Coast, Newcastle and Wollongong.

<b>The number of charging stations included within a bid</b>	<b>Minimum number of regional charging stations that must be included within a bid</b>	<b>Minimum number of metropolitan charging stations outside Sydney that must be included</b>
1-3	0	0
4-6	1	0
7-12	2	1
13-18	3	1
19-24	4	2
25+	5	2

## Standard Track Site Details

Please ensure that you complete **all** the following questions for each proposed site included in your bid.

Select **add more** to add additional rows. Select **maximise** to enlarge the grid while filling in.

**Site address**

**Select the geographic region of this site:**

**If not located in a standard priority zone, provide your rationale for how**

# Drive electric NSW fast charging Round 2 Application Form Preview

**this site meets the NSW Government’s objectives for the grant? Please write N/A if it is within a standard zone**

Suburb/Town, State/Province, Postcode, and Country are required.	If this site falls outside of a standard priority zone, please select the zone which the proposed site is closest to.	The NSW Government’s objectives for the grants are listed in the EV fast charging guidelines. Note that sites not explicitly located in a fast-track zone will be viewed and assessed as though it were located in a standard zone. Must be no more than 300 words.

## Fast Track Site Details

Please ensure that you complete **all** the following questions for each proposed site included in your bid.

Select **add more** to add additional rows. Select **maximise** to enlarge the grid while filling in.

**Site address**

**Select the geographic region of this site:**

**If not located in a fast-track priority zone, provide your rationale for how this site meets the NSW Government’s objectives for the grant? Please write N/A if it is within a fast-track priority zone**

Suburb/Town, State/Province, Postcode, and Country are required.	If this site falls outside of a fast-track priority zone, please select the zone which the proposed site is closest to.	The NSW Government’s objectives for the grants are listed in the EV fast charging guidelines. Note that sites not explicitly located in a fast-track zone will be viewed and assessed as though it were located in a standard zone. Must be no more than 300 words.

## Sites and station designs

### Standard zone sites and station designs

Please ensure that you complete ALL the following questions for each proposed site included in your bid.

Select **add more** to add additional rows. Select **maximise** to enlarge the grid while filling in the responses.

# Drive electric NSW fast charging Round 2 Application Form Preview

## State road signage for regional stations

### For your information only

Certain regional sites in round two may include a set contribution for wayfinding signage on major roads and highways. The Department will include a contribution between \$7,000 and \$15,000 for eligible sites dependent on cost of installation at that location. This contribution will be separate to an applicant's bid and will be added in addition to the final co-funding offer.

This will be discussed in further detail with successful applicants in qualifying regional sites.

## Project site budget

\* indicates a required field

### Standard zone site specific project budget

Provide a breakdown of capital costs for each individual charging station located in a standard zone against eligible expenditure items, including, but not limited to, equipment, hardware, site lease, network upgrades, site security and construction / installation.

**Renewable energy and storage plant and installation should be excluded from this section.**

Applicants are required to prepare and submit a budget for each charging station located within a standard zone included within their bid. An agreed budget will form part of the funding deed with the NSW Government. Funding must be used only for eligible expenditure.

**If you have no costs against a particular line item, ensure you enter "0" into this field as all cost fields are mandatory.**

## Project sites and bid cost summary

### Standard zone project sites bid cost summary

Applicants may allocate requested co-funding across multiple charging stations located in standard zones within a bid, as long as the total requested funding envelope does not exceed 50% of the total project value.

Projects located in standard zones must not exceed a maximum of \$490,000 for each charging station included in a bid on average.

Applicants may submit bids for co-funding up to a total of \$30 million across the whole bid (including sites located across both fast-track and standard zones) in round two.

Please note, all cost fields related to stations located in standard zones on pages 8 (renewables), 9 (battery storage) and 11 (project budget) must be completed before the table will calculate below. All fields must have a minimum of "0" entered on each of those pages before a summary of your costs appear below. We recommend the form be completed in chronological order.

As an example, an applicant may put in a bid for 25% of the capital cost of a charging station in one standard zone, but 75% of the construction cost of another charging station

# Drive electric NSW fast charging Round 2 Application Form Preview

in another standard zone location. As the total co-funding request for all stations located in standard zones does not exceed 50%, this bid would be deemed eligible. The final grant amount to be offered for the portfolio of charging stations located in standard zones must be below the maximum cap of 50% of the standard track total project value (i.e. for all charging stations located in standard zones within a bid).

Please see an example of a funding allocation for a bid in the funding guidelines.

Please provide a breakdown of your co-funding request per site in the table below.

<b>Site address</b>	<b>Geographic region of this standard site:</b>	<b>Standard total project value (TPV) per station</b>	<b>Renewables batteries component</b>	<b>Enter the co-funding \$ required for each project site located in standard zones</b>	<b>Total co-funding request (%)</b>	<b>Applicant contribution (%)</b>
---------------------	-------------------------------------------------	-------------------------------------------------------	---------------------------------------	-----------------------------------------------------------------------------------------	-------------------------------------	-----------------------------------

This question is read only.	If this site falls outside of a standard priority zone, please select the zone which the proposed site is closest to. This question is read only.	This total includes the renewables and battery costs displayed in the next column. This number/amount is calculated.	This amount is included in the station TPV column to the left. This number/amount is calculated.	Applicants may allocate requested co-funding across charging stations located within standard zones within a bid, as long as the total requested funding envelope does not exceed 50% of the standard total project value (ST-TPV) and the cap does not exceed \$490,000 average over all sites.	This number/amount is calculated.	This number/amount is calculated.

displayed in the next column This number/amount is calculated.	This number/amount is calculated.			portfolio of charging stations must be below the maximum cap of 50% of the TPV (i.e. for all charging stations within a bid) This number/amount is calculated.
\$	\$	\$		

## Across bid average contributions

Total co-funding request (%) is capped at 50% and must not exceed a maximum of \$490,000 for each charging station included in a bid on average.

### Average co-funding request across bid

\$

This number/amount is calculated.  
This is the average bid per site across an Applicant's bid

### Applicant contribution

\$

This number/amount is calculated.  
This is the total amount the Applicant will be providing towards all stations across this bid.

## Fast-track zone project sites bid cost summary

Applicants may allocate requested co-funding across multiple charging stations located in fast-track zones within a bid, as long as the total requested funding envelope does not exceed 70% of the total project value (TPV).

Projects located in fast-track zones must not exceed a maximum of \$900,000 for each charging station included in a bid on average.

Applicants may submit bids for co-funding up to a total of \$30 million across the whole bid (including sites located across both fast-track and standard zones) in round two.

Please note, all cost fields related to stations located in fast-track zones on pages 8 (renewables), 9 (battery storage) and 11 (project budget) must be completed before the table will calculate below. All fields must have a minimum of "0" entered on each of those pages before a summary of your costs appear below. We recommend the form be completed in chronological order.

As an example, an applicant may put in a bid for 95% of the capital cost of a charging station in one fast-track zone, but 45% of the construction cost of a charging station in another fast-track location. As the total co-funding request for all stations located in fast-track zones does not exceed 70%, this bid would be deemed eligible. The final grant amount to be offered for the portfolio of charging stations located in fast-track zones must be below the maximum cap of 70% of the Fast Track Total Project Value (i.e. for all charging stations located in fast-track zones within a bid).

Please see an example of a funding allocation for a bid in the funding guidelines.

Please provide a breakdown of your co-funding request per site in the table below.

## Milestone summary

\* indicates a required field

# Drive electric NSW fast charging Round 2 Application Form Preview

## Project milestones, key activities and data sharing

The NSW Government intends to offer 6 milestone payments across the lifecycle of these projects. The final amounts and the number of milestones for successful bids will be confirmed prior to the signing of a funding agreement with the NSW Government.

Note, fast-track stations will need to be operational within one year (should this be 18 months?) of the execution of a funding agreement with the NSW Government, whereas standard sites will have 2 years to be operational.

**Please provide the milestone number below**

**Start Date**

**End Date**

	The start date must be set to the first day of the month Must be a date.	The end date must be set to the last day of the month Must be a date.

## Data capturing

Describe your data capturing capabilities for the project during installation and operation. Ensure you include how data will be made available to the Department.

Please include:

- any detail on how the proposed data sharing systems could be used in interoperability protocols in the future
- a timeline for post project knowledge sharing activities, including intervals for data sharing
- a list of any other entities with access to station data

**Describe your data capturing capabilities for the project during installation and operation and how data will be made available to the Department. \***

Word count:

Must be no more than 1000 words.

Include • any detail on how the proposed data sharing systems could be used in interoperability protocols in the future • a timeline for post project knowledge sharing activities, including intervals for data sharing • a list of any other entities with access to station data

## Implementation and knowledge sharing activities - standard track zones

This section is pre-populated from your earlier responses. Any edits will need to be completed on your earlier entries.

## Merit criteria

\* indicates a required field

Merit criterion A: Cost and sizing of charging infrastructure and the value for money offered by your project

**Provide a rationale for your project cost and size and demonstrate the value for money offered by your project \***

Word count:

Must be no more than 1500 words.

You will need to upload a business case and project development plan following this question.

**Please upload both a detailed business case for your project and a project development plan \***

Attach a file:

A maximum of 2 files may be attached. Maximum file size 25MB. Refer to Appendix 1 for guidance on what to include in your business case and project plan

Merit criterion B: Proposed charging station locations

# Drive electric NSW fast charging Round 2 Application Form Preview

Ensure to state why they would be suitable for EV Fast Charging and include:

- The distance to and type of local businesses and amenities near each proposed charging station
- The details of any existing public infrastructure or buildings at the site
- The visibility of the charging station to the public

**Provide a rationale for your project locations and demonstrate their strengths and features. \***

Word count:

Must be no more than 1500 words.

**Please upload any relevant supporting evidence regarding permission to occupy or develop a site**

Attach a file:

Maximum file size 25MB

## Merit criterion C: Charging station design and project delivery

Your response should include:

- Project development plan, including comprehensive information for each delivery stage across all charging stations proposed in the bid
- An overview of any charging management systems in place and how they work
- Overview of key supplier agreements
- Status and approach to development approval processes, including engagement with local councils and other regulatory bodies
- Risk management plan, including detailed assessment of project risks and mitigation strategies. Stakeholder engagement plan
- Work health and safety management system plan
- Evidence of station accessibility, public accessibility per day, and accessibility to heavy vehicles
- The anticipated hardware to be used in the construction of chargers and their warranty conditions.

Must be no more than 1500 words.

**Provide a rationale for your project station design, highlighting the strengths of your methodology for construction and management of the charging stations you have proposed. \***

# Drive electric NSW fast charging Round 2 Application Form Preview

Word count:

Must be no more than 1500 words.

**Provide some rationale for your project budget and assumptions, include a summary of any contingency plans to manage cost overruns. \***

Word count:

Must be no more than 1500 words.

**Please upload any additional relevant supporting documents, including station design, layout or electrical diagrams.**

Attach a file:

Maximum file size 25MB

## Merit criterion D: Network access

Consider the following points:

- The distance to nearest substation and the proposed connection point to the network
- The available network capacity in the proposed location
- Any existing working relationship an applicant might have with local DNSP

You may provide evidence of engagement status with DNSPs, such as a letter verifying the connection status from a DNSP or copies of correspondence with the DNSP.

Must be no more than 1500 words.

**Describe your overall expectations and investigations into networks connections across your sites. \***

Word count:

Must be no more than 1500 words.

**Please upload any relevant supporting evidence regarding your engagement status with DNSPs**

Attach a file:

Maximum file size 25MB

# Drive electric NSW fast charging Round 2 Application Form Preview

## Network access for your project sites

Your summary must include:

- The total connection required (in kVA) for each proposed charging station
- The distance to nearest substation and the proposed connection point to the network
- The available network capacity in the proposed location
- Any existing working relationship an applicant might have with local DNSP

### Attach summary details of the network access for each of your project sites

Attach a file:

A maximum of 1 file may be attached.  
Maximum file size 25MB

### You may also provide evidence of your engagement status with DNSPs, such as a letter verifying the connection status from a DNSP or copies of correspondence with the DNSP:

Attach a file:

Maximum file size 25MB

## Merit criterion E: Renewable energy and battery storage

This section is pre-populated from your earlier responses. Any edits will need to be completed on your earlier entries.

The total kWh of renewable energy proposed from all project sites

**The total kWh of renewable energy proposed from all project sites**

This number/amount is calculated.

**The total kWh of battery storage proposed from all project sites**

This number/amount is calculated.

**Describe the use of GreenPower for purchasing large-scale generation certificates (LGCs), or the annual compliance process for the surrendering of LGCs, if relevant to your project**

Word count:

Must be no more than 1500 words.

## Battery & renewable electrical and technical specifications

Refer to Appendix 1 for additional guidance on what to include.

**Please attach any available electrical diagrams or technical specifications for the renewable energy system/s and/or the battery storage system/s \***

Attach a file:

Maximum file size 25MB

**Please attach a map outlining the footprint of any proposed renewable energy system/s \***

Attach a file:

Maximum file size 25MB

**Please attach any site layout drawings outlining the footprint of the battery storage system \***

Attach a file:

Maximum file size 25MB

## Merit Criteria (Continued)

\* indicates a required field

### Merit criterion F: Applicant capabilities and capacity

Include a summary of your previous performance, skills and experience. Refer to the guidelines for additional guidance.

#### **Describe your capabilities and capacity to undertake the project. \***

Word count:  
Must be no more than 1500 words.

#### **Upload supporting documents as required**

Attach a file:

Maximum file size 25MB

### Merit criterion G: Support jobs and economic growth

Refer to the guidelines for additional guidance.

#### **Describe how your projects support jobs and economic growth \***

Word count:  
Must be no more than 1500 words.

## Standard Track

**Site address**

**Please provide the estimated number of full-time equivalent (FTE) jobs directly related to the construction phase of the project**

**Please provide the estimated number of full-time equivalent (FTE) jobs directly related to the ongoing operation and maintenance of the station**

This question is read only.	This question is read only.	This question is read only.

## Additionality provided by NSW Government Grants

### Optional questions

The following questions are non-assessable.

The questions below are optional, as the NSW Government would like to understand the impact these grants have on the development of the EV Fast Charging market. These responses will be used to evaluate the effectiveness of this program, and to shape future decisions around government programs. Any information provided here would be appreciated.

#### **What are the main barriers for you installing EV fast charging stations without NSW Government support?**

- Low return on investment
- Not enough EV motorists in NSW
- The connection process with DNSPs
- Other:

#### **Please elaborate on your response**

#### **Can you elaborate on how NSW Government grant funding will assist you to build EV fast charging stations that you would not have built otherwise:**

#### **Without the NSW Government co-funding grants, when do you believe the proposed stations would have been built?**

## Declaration

\* indicates a required field

# Drive electric NSW fast charging Round 2 Application Form Preview

I am an authorised representative of the organisation making this application. As the authorised representative for my organisation, I agree that

- I have read and understood the funding guidelines for the Drive electric NSW fast charging grants
- I understand that I may be requested to provide further clarification on documentation to verify the information supplied in this form and that the NSW Office of Energy and Climate Change may consult with other agencies and/or may enlist external technical or financial advisors to advise on information provided in this application form.

If successful,

- I understand my organisation may be invited to progress to the second stage application
- I understand, if the second stage application is also successful, my organisation must enter into an agreement with a signed funding deed with the department before financial assistance is provided
- I understand that, if an offer of financial assistance is made, I will have a limited period of time of 20 days in which to negotiate and finalise an agreement before the funding deed is formally executed
- I declare the information contained in this application, to the best of my knowledge, is true, accurate and complete
- I acknowledge that if the department is satisfied that any statement made in the application for funding is incorrect, incomplete, false or misleading, the department may take appropriate action. I note such action may include excluding an application from further consideration, withdrawing an offer of funding, and/ or terminating any funding deed entered into.

**I agree to the above declaration \***

Yes

**Person with delegated authority to approve this bid \***

Title      First Name      Last Name

--	--	--

**Their position \***

**Their telephone number \***

Must be an Australian phone number.
